

Grupo Ezentis: Modernizing Business Operations for Agile Innovation and Growth

Grupo Ezentis SA is a global industrial group engaged in the maintenance, operation, and construction of power and telecommunications infrastructures. With a presence in Europe and Latin America, the organization is committed to fostering universal access to telecommunications and power supply technologies that nurture the development of society. Its central mission is to help reduce energy poverty and the technology gap in a globalized world.

To meet these ambitions, Grupo Ezentis looked to modernize its operations and **standardize business processes** across the organization. The goal was to operate the business in real time, allowing it to grow profitably by offering innovative, efficient, and sustainable solutions that improve people's quality of life and satisfy its clients' needs.

Realizing the Promise of Digital Transformation at Speed with the Public Edition of **SAP S/4HANA® Cloud**

Before: Challenges and Opportunities

- Aging legacy ERP applications, limiting the ability to innovate and grow
- Manual processes and work-arounds, reducing business efficiency
- Readiness to move to next-generation ERP

Why SAP

- A modern business suite offering from the public edition of SAP S/4HANA® Cloud, helping shorten time to value with a library of predefined best practices
- Proven functionality that improves employee productivity by enhancing the user experience, automating workflows, and streamlining task delegation
- Personalized and proactive support throughout the deployment from the SAP® Preferred Success service, helping successfully steer the project to achieve business goals

After: Value-Driven Results

- Achieved lower total cost of ownership, eliminating hardware and on-site maintenance costs
- Enabled faster innovation and growth potential, thanks to the advanced technology embedded in SAP S/4HANA Cloud
- Smoothed integrations with various third-party applications and systems using SAP Business Technology Platform (SAP BTP)
- Created a future-ready technology foundation that can scale with ease

“The public edition of SAP S/4HANA Cloud provides a future-ready business foundation that can be used today. It delivers a **robust, scalable, and stable** infrastructure for ERP in the cloud, modernizing business operations and eliminating the need for on-site maintenance.”

THE BEST RUN

Operating in Real Time on a Future-Ready Business Foundation

Seeking a next-generation business suite, Grupo Ezentis SA took advantage of the SAP® Preferred Success service and implemented the public edition of SAP S/4HANA® Cloud. In doing so, the company transformed into an agile organization while minimizing risk. And with this transition, Grupo Ezentis not only migrated to advanced ERP but also moved its infrastructure to the cloud.

With access to SAP Business Technology Platform, Grupo Ezentis can connect various third-party applications to SAP S/4HANA Cloud, enabling efficient reporting from one source.

Using SAP S/4HANA Cloud, Grupo Ezentis shifted from using a transactional system to record data to one that takes advantage of real-time data from internal and external sources. Now, the company can make more informed decisions with up-to-date data and insights across the business.
